

# HIGH ABSORBENCY PREMIUM UNDERPAD FOR ANIMALS

Hygienic underpads for pets "Sana Set Super Premium" are specially designed to provide a comfortable and hygienic solution for pet owners who want to protect their home, car, or pet's living space from accidental spills, urine or feces. In addition the "SanaPet Super Premium" underpads feature super absorbent pellets (SAP) together with from cellulose fluff layer. These pellets are designed to absorb moisture quickly and efficiently, transforming it into a gel-like substance that is easy to dispose of.

Super absorbent pellets also neutralize odors, leaving your home or car smelling fresh and clean. This is especially important for pet owners who want to eliminate the unpleasant smells associated with pet urine and feces.

The super absorbent pellets used in these pads can hold more liquid than pads without SAP's, making them an ideal choice for pet owners who need a highly absorbent solution for their pets' needs.
