BIODEGRADABLE WET WIPES

Biodegradable wet wipes “SanaSet BabyCare” and “SanaSet BodyCare” are a type of disposable wet wipes that are specifically designed to be gentle on skin while also being environmentally friendly. These wipes are made from a special type of material that is biodegradable, reducing the impact on the planet.

The material used in these wipes is Carded-Airlaid-Carded technology which consists of cellulose-based viscose-pulp-viscose layers. The viscose fibers are soft and gentle on the skin, while the pulp provides absorbency and durability, sandwiched together to create a strong and absorbent wipe.

One of the main benefits of using biodegradable wet wipes is that they are made from natural materials and are free from harmful chemicals and additives, making them a safe and effective choice for baby and body care.
